

R.T. LARGE

ESTABLISHED 1969

MRTL261 CLAPTON (DL-23)

Features:

- High density LED technology
- Touch sensor switch
- SQ Class ultra-clear flat glass surface
- Copper free silver mirror with Valspar Anti-Oxidation coating
- LED lifespan over 100,000 hours
- Compliant with CE, EMC, LVD, IP44, RoHS

Installation and aftercare instructions:

Before you start it is recommended that the mirror is secured to a suitably reinforced wall to ensure stability. Wall plugs are only suitable for solid stone/brick walls. For plasterboard walls use specialist wall plugs (not supplied).

Wear suitable eye protection when drilling. Take care when using power tools near water - the use of a residual current device (RCD) is recommended. Beware of hidden pipes or cables. Take care when drilling tiled surfaces as the drill might slip. Use a piece of masking tape to prevent the drill from wandering.

Installation Procedure

IMPORTANT: ALWAYS SWITCH OFF THE ELECTRICAL SUPPLY AT THE MAINS DURING INSTALLATION AND MAINTENANCE.

1. Before installation. Decide on a desired location for the mirror. Be mindful of hidden water pipes or electrical cables behind the wall. It is recommended that infrared sensor (if applied) is kept a minimum distance of 150mm from the adjacent wall.

2. Drill the holes in the wall for the screw plugs supplied in the fixing kit. Ensure the holes are horizontal using a spirit level. Fasten the screws into the plugs leaving the screw head protruding about 10-8mm from the wall.

3. Unscrew the lid of the plastic box at the back of the mirror. Use the electrical connections found inside the box to connect the mirror to the main supply in accordance with the current IEE regulations. Once the connection is made, screw the lid back on the plastic box. Hang the mirror on the wall and switch on the electrical supply.

Colour coding:

L - Live = Brown

N - Neutral = Blue

E - Earth = Green & Yellow

Operating Instructions

Lighting is turned on/off using the touch sensor switch on the lower centre of the mirror surface, to operate, cover the touch zone in the circle with your finger, please note full cover of the circle is required, the sensor only reacts to a finger touch, finger nails will not work.

Electrical Safety Instructions

All fittings must be installed by a competent person, in accordance with current IEE wiring regulations. If in doubt please consult a qualified electrician.

Safety, Care and Cleaning

DO NOT strike glass components with hard or pointed items. DO NOT place very hot or very cold items against or in close proximity to glass surfaces unless an adequately thick insulation material is used to prevent such items coming in contact with the glass.

The nominal thickness of the mirror glass used in this product is 5mm. If the glass becomes chipped or broken replace immediately.

This product should not be positioned near curtains and/or other fabrics. Never cover the mirror. This product maybe become heated, we recommend that it is turned off after use and should never be left on for prolonged periods of time. It is recommended that the unit is cleaned with a soft, dry, non abrasive cloth when turned off. Never use cleaning agents or abrasive materials on any type of surface finish. Do not allow moisture to come into contact with the electrical components.
